Incorporating the Aerospace Medical Association, for public. This journal is devoted to reviewing and supporting all-journal explorers, who work or live in hazardous environments ranging from beneath the Earth to the outer reaches of space.

AEROSPACE MEDICAL ASSOCIATION is an organization devoted to charitable, educational, and scientific purposes. The Association was founded when the rapid expansion of aviation made evident the need for physicians with specialized knowledge of the flight environment. Since then, physicians have been joined in this Association by professionals from many fields and from many countries, all linked by a common interest in the health and safety of those who are involved in creating vehicles that fly in the air, on the ground, beneath the Earth or the sea, in the air, or in outer space. The original scientific articles in this journal provide the latest available information on investigations into such areas as changes in the ambient pressure, motion sickness, increased or decreased gravitational forces, thermal stressors, vision, fatigue, circadian rhythms, psychological and environmental stresses, predictions of success, health maintenance, human factors engineering, clinical care, and others. This journal also publishes notes on scientific news and technical items of interest to the general reader, and provides teaching materials and reviews for health care professionals.

MEMBERSHIP – The Aerospace Medical Association welcomes members interested in aerospace medicine and human performance. Membership applications may be obtained online at www.amma.org or from the Aerospace Medical Association’s headquarters at 230 S. Henry Street, Alexandria, VA 22314, or through the Membership Department at (703) 739-2240, grantej@asma.org or amhpeditor@asma.org.

SUBSCRIPTIONS – The Aerospace Medical Association is committed to the distribution of all articles that appear in Aerospace Medicine and Human Performance. Articles appearing in the journal are distributed electronically. Subscriptions and addresses of subscribers are shared with the Subscripted Distribution Department, Aerospace Medicine and Human Performance, 230 S. Henry Street, Alexandria, VA 22314, at least 90 days in advance of the release date. Institutional subscription rates (including online access; other options available): U.S. $1315; Canada $2530; other countries $2650 (includes air delivery). Agent Disc. 20%.

Institutional Subscription Rates (including online access; other options available): U.S. $1315; Canada $2530; other countries $2650 (includes air delivery). Agent Disc. 20%.

Copyright 2015 by the Aerospace Medical Association. All rights reserved. This journal is also available online at www.amma.org.

Notes:

1) Page proofs must be returned within 10 days of receipt.
2) Manuscripts must be typewritten, double-spaced, with margins at least one inch wide.
3) Author contributions must be submitted within 30 days of acceptance.
4) Manuscripts must be black & white: 1200 dpi for line art; 300 dpi for photos; 600 dpi for combination art. They must be sent electronically, preferable at high resolution TIFF or EPS files. See Documents to Download for further instructions.

REFERENCE STYLE

The style for references is the National Library of Medicine (NLM) format, using superscripts i.e. alphabetical by author.

SELECTION AND FORMATTING OF REFERENCES

The Corresponding Author is responsible for providing complete, accurate references so that a reader can locate the original material. References must be formatted in a modified Vancouver style, and listed alphabetically, numbered, then cited by number. An extensive set of examples of different types of references can be found on the website under Documents to Download.

MANUSCRIPT SUBMISSION (see details online)

Items for keynote input:
1) Title
2) Authors
3) Keywords
4) Classification
5) Files for uploading (Word or WordPerfect preferred format)
6) Cover Letter/Explanation
7) Manuscript
8) Figures
9) Answers

Items requiring signature to be fax or e-mail:
1) Copyright release form
2) Agreement to pay charges for figures (if more than four)

PUBLICATION PROCEDURES

Once the author has accepted a manuscript, the electronic source files for text (Word or WordPerfect) and figures (TIFF or EPS preferred) are forwarded to the publisher, the Aerospace Medical Association, for conversion to printable format and final copy editing. Correspondence related to publication should be directed to the Managing Editor at the Aerospace Medical Association Home Office: (703) 739-2240, pdayj@asma.org.

When the paper is ready for publication, the printer places on its web site a PDF file depicting the typset manuscript. The Corresponding Author will be notified by e-mail and is responsible for correcting any errors and for responding to any “Author Queries” (Q).

NOTES FOR AUTHORS

These notes are provided for the convenience of authors considering preparation of a manuscript. A definitive information appears in the INSTRUCTIONS FOR AUTHORS as published on the journal’s web site. Submissions that do not substantially conform to those instructions will be returned without review. We conform to the International Committee of Medical Journal Editors (ICMJE)/Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals.

JOURNAL MISSION AND SCOPE

Aerospace Medicine and Human Performance is published monthly by the Aerospace Medical Association. This journal publishes original articles that are subject to formal peer review as well as teaching materials for health care professionals. The editor will not ordinarily review for publication work that is under consideration or has been accepted or published by another journal except as an abstract or a brief preprint.

TYPES OF PAPERS

The first five types of articles specified below should be submitted through the web site and will undergo peer review. Other submissions including Letters to the Editor, Book Reviews and teaching materials should be submitted by e-mail to the Editorial Office. Letters to the Editor are limited to 500 words of discussion and/or criticism of scientific topics, papers that have appeared in the journal within the past year.

Research Articles present the results of experimental or descriptive studies with suitable statistical analysis of results. They should contain an Introduction, Methods, Results and Discussion with a statement of conclusions. Such manuscripts may not exceed 6000 words with approximately 25 references.

Review Articles are scholarly reviews of the literature on important subjects within the scope of the journal. Authors considering preparation of a review should contact the Editor to ascertain the suitability of the topic. Reviews generally may not exceed 6000 words with up to 150 references, but longer reviews of exceptional quality will be considered.

Case Reports and Case Series describe interesting or unusual clinical cases or aeronautical events. They should include a short introduction to provide perspective, the Presentation of the Case, and Discussion that includes references to pertinent literature and/or review of similar cases. Such manuscripts may not exceed 3000 words with approximately 15 references.

Short Communications and Technical Notes describe new techniques or devices or interesting findings that are not suitable for statistically significant analysis. They should contain the same sections as a Research Article but may not exceed 3000 words with approximately 12 references.

Commentaries are brief essays that set forth opinions or perspectives on relevant topics. Such manuscripts may not exceed 1000 words with approximately 10 references without tables or figures.

Letters to the Editor, Reviews, Historical Notes, and You’re the Flight Surgeon articles.

RULES FOR DETERMINING AUTHORSHIP

Any new or revised acceptance letter from the Editor includes the statement: "By submitting a manuscript to the Aerospace Medicine and Human Performance, the author(s) agree to make all data available in the public domain if the manuscript is published by the Aerospace Medical Association. The journal publishes original articles that are subject to formal peer review as well as teaching materials for health care professionals. The editor will not ordinarily review for publication work that is under consideration or has been accepted or published by another journal except as an abstract or a brief preprint. "

Aerospace Medicine and Human Performance (ISSN 2375-6314 [print]; ISSN 2375-6322 [online]) is published monthly by the Aerospace Medical Association, 230 S. Henry Street, Alexandria, VA 22314-1579. Periodicals postage paid at Alexandria, VA and at additional mailing offices. Postmaster, send changes of address to Aerospace Medicine and Human Performance, c/o The Sheridan Press, 451 Faye Ave., Hanover, VA 23369.

All correspondence related to submission should be directed to the Managing Editor at the Aerospace Medical Association Home Office: (703) 739-2240, pdayj@asma.org.

When the paper is ready for publication, the printer places on its website a PDF file depicting the typset manuscript. The Corresponding Author will be notified by e-mail and is responsible for correcting any errors and for responding to any “Author Queries” (Q).
