## CONTINUING MEDICAL EDUCATION PROGRAM GOALS

Recognize the importance of the Aviation Medical Examiner's role in the overall goal of achieving aviation safety through improved application of aerospace medicine competencies.

Develop a clear understanding of how the AME and his/her staff work as a team with the Federal Aviation Administration to achieve aviation safety.

Recognize the importance of the medical certification process, the significance of providing quality aviation medical exams, and the need for correctly completing FAA Form 8500-8.

Develop a clear understanding of the medical certification process and familiarize the AME with his/her responsibilities in that process.

Familiarize the new AME with FAA medical standards, policies and procedures, and where to find this information in the Guide for Aviation Medical Examiners, Federal Aviation Regulation, Part 67, and other sources.

Provide the latest medical and technical information and clinical techniques in the various medical fields and specialties to assist and/or improve the proficiency of AME's in their regular practice.

Establish the AME as a local authority in aviation medicine and as a resource to assist medical colleagues in determining who may be able to fly safely as a patient or airman.

Improve the AME's knowledge, techniques and skills in medically evaluating airmen. This is accomplished by instructing AMEs in those medical specialties and behavioral sciences that will enable them to assess the pilot's ability to operate an aircraft with maximum mental and physical proficiency.

Recognize the basis for disqualification of an airman with a medical problem and the conditions necessitating deferral or denial as outlined in Federal Aviation Regulations.

Understand and be able to explain to an airman the denial process to include steps necessary for certification appeal rights.

Enable the AME to conduct a thorough clinical examination assuring that the airman meets the Medical Certification Standards for the class of airman medical certificate applied for.
